INDEX OF SUBJECTS

Volumes 46 and 47

January 1971 • December 1971

Journal of the National Cancer Institute

2-Acetylaminofluorene, mouse bladder epithelium disorganized by, **46**:337

Acetylcysteine, cyclophosphamide-induced cystitis ameliorated in dogs and monkeys given, **47**:223

Actinomycin D:
- kinetics of lethal action of, on transplantable mouse leukemia, **46**:1177
- short-term effects on murine lymphocytic leukemia P388, **47**:1309

Adenocarcinomas, murine, changes in lymphoreticular tissues during growth of, **47**:301, 313, 321

Adenomas *see also* Adenocarcinomas
- hepatic, DNA measurements on cell nucleus of, in mice, **47**:47

Adenovirus-7 and -12 *see* Virus

Adrenal tumors, induced by X radiation in germfree rats, **47**:229

Aflaxtoxin(s):
- B_1, effect of structural changes on hepatocarcinogenicity in rainbow trout, **46**:561
- B_1 and M_1, synthetic, toxicity and biochemical and fine structural effects of, in rat liver, **47**:585

Age:
- decreasing immune competence and development of reticulum cell sarcomas in lymphatic tissue of aged mice, **46**:809
- influence of, on tumor induction by repeated injections of urethan in newborn and adult hamsters, **46**:81
- at menarche and human breast cancer, **47**:935

Alimentary tract, histopathology of tumors of, produced by *N*-methyl-*N'*-nitro-*N*-nitrosoguanidine in dogs, **47**:1053

Amines, secondary, lung adenomas induced in Swiss mice by concurrent administration of sodium nitrite and, **46**:1029

Amino acids *see also* Names of
- phenylalanine, diet deficient in,
  - pituitary-induced nodular hyperplasia inhibited in mammary glands of C3H mice fed, **46**:929
  - transformation of mammary preneoplastic nodules to tumor inhibited in C3H mice fed, **47**:245

Amyloid, development of, in BALB/c mice inoculated with syngeneic cells from young and old donors, **47**:1241

Announcements:
- American College of Surgeons, **47**:497
- Annual Meeting of the American Association for Cancer Research, Inc., **46**:445
- Applications Requested for Grants to Construct Cancer Research Facilities, **47**:729
- Chemical Carcinogenesis Contract Program, **47**:267

- International Journal of Cancer, **47**:267
- International Prize Offered in 1972, **47**:730
- International Symposium on RNA Viruses and Host Genome in Oncogenesis, **46**:213
- Manuscripts Approved for JNCI, **46**:213, 446, 691, 919, 1117, 1363; **47**:268, 497, 731, 911, 1165, 1407
- National Cancer Institute Monograph 33, May 1971, **47**:730
- New Edition of *Educational Opportunities for Laboratory Personnel*, **47**:1165
- Society of Toxicology, **47**:729
- Special Announcement—Brief Communications, **47**:913, III (Dec.)
- Symposium on Comparative Leukemia Research, **46**:214
- Symposium for Referring Physicians, **47**:911
- Third British Academic Conference in Ontolaryngology, **46**:446
- Workshop and Symposium on "Transplantation Genetics of Primates," **46**:1117

Antibody(ies) *see also* Antigens; Immunity studies
- to adenovirus-12-induced tumor antigen(s), indirect paired radioiodine-labeled antibody technique to detect, **47**:447

Antibody(ies)—Continued
cytotoxic, reactive with cultures of lymphoid cells in disease and normal human sera, **47**:489
to early Epstein-Barr virus-induced antigens in Burkitt's lymphoma, **46**:861
to Epstein-Barr virus,
in monkeys, seroepidemiology of, **46**:881
in WI-L1 and WI-L2 human lymphoblastoid lines, **46**:647
group-specific, of avian leukosis virus in human leukemic sera, search for, **46**:1357
membrane-reactive, associated with Epstein-Barr virus, blocking of direct membrane immunofluorescence in titration of, **47**:539
murine plasmacytomas producing, cell culture of, **46**:403
precipitating, spontaneous occurrence of, to mammary tumor virus in mice, **47**:801
to 7S and 19S, from early (7-day) and late (7-week) rabbit immune sera, differentiation by immunoferritin of herpes simplex virion antigens with use of, **46**:629
herpesvirus activity against lymphoid cell line (Belev) serum IgG from breast cancer patient detected by complement-fixation, **47**:511
immunogenicity of disrupted cells prepared
variations in polyovirus-7 hamster tumor cell line, **46**:1195
from adenoherpesviruses in sera from patients with
to various [illegible] **47**:747
sarcoidosis, [illegible] antibodies; Immunity studies
Antigen(s) *see also* [illegible]ssively transferred tumor immunity *in*
abrogation of [illegible]ically related tumor cells in guinea *vivo* by antige[illegible]
pigs, **46**:195 [illegible]stein-Barr virus produced in experi-
associated with Ep[illegible]ymphoblastoid cell lines, **46**:1243
mentally infected [illegible] by cytotoxic test on Friend virus-
cell surface, detectabl[illegible]rus-infected tumors in rat, **46**:449
induced and Friend v[illegible] by antiglobulin consumption
common, demonstratio[illegible]ra of, in tissues infected with
test with murine antis[illegible] from different mouse strains,
mammary tumor virus
46:253 [illegible], chronologic changes in
cutaneous immunofluorescen[illegible] development of, and of
occurrence, distribution, an[illegible]'s disease, **47**:389
lymphoid aggregates of Mare[illegible]mor virus in blood and
distinct forms of, of mammary tu[illegible]5
mammary tissues of mice, **46**:10[illegible] with Walker 256
feto-tumor serum, serologic studies [illegible]dified by contact
tumor-rat model, **47**:871
functional capacity of bone marrow mo[illegible]233
with antigenic substances in mice, **47**:1[illegible]mmunoferritin
herpes simplex virion, differentiation by i[illegible] from early
of, with use of rabbit 7S and 19S antibodi[illegible]629
(7-day) and late (7-week) immune sera, **46**:[illegible]46:577
HL-A, loss of, in human malignant lymphoma, [illegible]taneous
to Mason-Pfizer monkey virus isolated from spo[illegible]d by
mammary carcinoma of female monkey detec[illegible] ag-
immunodiffusion, immunofluorescent, and virus[illegible]
glutination techniques, **46**:1325
prepared from influenza and vesicular stomatitis vir[illegible]s
grown in suspension culture of Ehrlich ascites cells,
tumor immunity induced in mice with, **46**:1161

Antigen(s)—Continued
RNA tumor-virus, expression of, in chemically induced tumors, virus-genome-specified common antigens detected by complement fixation in mouse tumors induced by 3-methylcholanthrene, **47**:1255
subcellular, graft-versus-host reaction modified by *in vitro* preincubation of mouse marrow with, **46**:139
surface, of Shope papilloma cells, trypsin sensitivity of, **46**:353
tolerance induction and sensitization by preincubation of bone marrow with allogeneic erythrocytes in mice, **47**:1223
transplantation, cross-reacting tumor-specific, in 3-methylcholanthrene-induced guinea pig sarcomas, **46**:693
tumor-specific transplantation and membrane, in mouse cell lines transformed *in vitro* by Rous sarcoma virus, **47**:819
of unfertilized mouse eggs and mouse cells transformed by simian virus 40, immunologic cross-reactivity between, **46**:1317
viral, immunologic reactivity to, in chickens infected with avian leukosis viruses, **46**:701
water-soluble, tumor-specific obtained from diethylnitrosamine-induced guinea-pig hepatoma cell lines by extraction of lyophilized tumor cells with hypertonic potassium chloride, **47**:703
Antitumor agents *see also* Actinomycin D; L-Asparaginase; 1,3-Bis(2-chloroethyl)-1-nitrosourea; Camptothecin; 1-(2-Chloroethyl)-3-cyclohexyl-1-nitrosourea; Cyclophosphamide; Cytosine arabinoside; 5-Fluorouracil; Gallium nitrate; Hydroxyurea; Interferon; Metals; Methotrexate; Nitrogen mustard; Polyribonucleotide; Tilorone hydrochloride; Vincristine
tumorigenicity of benzo[*a*]pyrene inhibited by various natural products, in mouse skin, **46**:1039
Asbestos, cancer from exposure to, **46**:V (May)
Ascites tumors *see also* Ehrlich
mouse, hexokinase activity in tumorigenic and nontumorigenic cell cultures derived from cells of, **47**:15
L-Asparaginase, from *Serratia marcescens*, lymphoma 6C3HED inhibited by, in mice, **46**:1271
Asparagine, utilized by mouse leukemia cells, **46**:291
Atomic bomb, cancer related to, **47**:V (Aug.)
Avian leukosis *see* Marek's disease; Virus
Avian myeloblastosis *see* Virus
Aziridine ethanol, carcinogenicity in mice, **46**:143
Azo dyes *see* Names of

Bacillus Calmette-Guérin:
immunity to polyoma tumors and spontaneous leukemia in mice stimulated by, **47**:1013
living, tumor growth suppressed in guinea pigs at site of infection with, **46**:231
Benzo[*a*]pyrene:
cocarcinogenicity of,
and 7,12-dimethylbenz[*a*]anthracene in cigarette smoke carcinogenesis, importance of tumor promoters in, **47**:235

Benzo[*a*]pyrene—Continued
cocarcinogenicity of—continued
with various tobacco leaf and tobacco smoke components and related synthetic compounds and with phorbol myristate acetate, on mouse skin, **46**:1039
content, distribution, and fate of, in soil of various USSR regions, **47**:1179
effects of, given to mice during pregnancy on progeny, **46**:397
tumors induced by,
in C3H mouse, transfer of tumor-specific immunity with RNA, inhibition of growth of murine tumor isografts, **46**:735
primary, in Syrian hamsters, **46**:171
Besnoitia jellisoni, chronic, protozoan infection, resistance of AKR mice to lymphoid leukemia associated with, **47**:485
1,3-Bis(2-chloroethyl)-1-nitrosourea, effect on hematopoietic precursors in mice, **47**:971
Bladder tumors, induced by *N*-2-fluorenylacetamide, enhancing action of pyridoxine-deficient diet and cyclophosphamide in Fischer 344 female rats, **46**:585
characterization of 3 cell lines derived from, **46**:597
Blood *see also* Lymphocytes
erythrocytes, allogeneic, tolerance induction and sensitization by preincubation of bone marrow with, in mice, **47**:1223
leukocytes,
of healthy persons, initiation and establishment of lymphoid cell lines from, **47**:469
from umbilical cord treated with viruses, chemicals, and radiation, cell line initiation from, **47**:479
Bone, osteogenic sarcoma of, immunofluorescence tests on sera of patients with, **46**:1299
Bone marrow:
cells of mouse, influence of Ehrlich ascites carcinoma on repopulating ability of, **47**:555
cells of rat, specific vulnerability of largest telocentric chromosome of, to 7,12-dimethylbenz[*a*]anthracene, **47**:1267
functional capacity of, modified by contact with antigenic substances in mice, **47**:1233
human, normal and leukemic, *in vitro* growth of, **46**:989
tolerance induction and sensitization by preincubation of, with allogeneic erythrocytes in mice, **47**:1223
Books received, **46**:211, 443, 689, 917, 1115, 1361; **47**:265, 495, 727, 909, 1163, 1406
Bovine leukemia *see* Leukemia
Bovine papilloma *see* Virus
Bowel cancer, neglected leads to causation of, **47**:913
Bracken fern, phenothiazine inhibition of intestinal and urinary bladder tumors induced in rats by, **47**:155
Brain tumors, experimental, in mice, evaluation of 1-(2-chloroethyl)-3-cyclohexyl-1-nitrosourea, vincristine, and 5-fluorouracil in treatment of, **46**:359
Breast *see* Mammary
Burkitt's lymphoma *see also* Virus—Epstein-Barr
antibodies to early Epstein-Barr virus-induced antigens in, **46**:861
Burkitt's lymphoma—Continued
cytotoxic antibody reactive with cultures of lymphoid cells in sera of patients with, and in normal human sera, **47**:489

Viper, Russell's, tumor-bearing, histology and electron microscopy of, establishment of "C"-type virus-producing cell line, **46**:309
Vipera russelli see Viper
Virus:
adenovirus,
-2, nononcogenic SA7-adenovirus 2, populations of, that immunize against SA7-transformed cells, **46**:565
-7, hamster tumor cell line, varying immunogenicity of disrupted cells prepared from, **46**:1195
-12, tumor serology, indirect paired radioiodine-labeled antibody technique applied to, **47**:447
avian leukosis,
immunologic reactivity to viral antigens in chickens infected with, **46**:701
and Rauscher murine leukemia morphologically compared, **47**:1289
search for group-specific antibodies of, in human leukemic sera, **46**:1357
avian myeloblastosis transmitted by BAI strain A virus RNA, **46**:713
bovine papilloma, subcutaneous papillomatous cysts produced by, **47**:891
"C"-type, establishment of cell line producing, from tumor-bearing viper, electron microscopy of, **46**:309
C-type particles,
in disseminated rhabdomyosarcomas formed in kittens by cultured human rhabdomyosarcoma cells, **47**:603
replicating, in continuous cell culturese stablished from leukemic cows, effect of culture medium, **47**:613
in salivary tissue of domestic cats, **47**:561
in tumor tissue of woolly monkey (*Lagothrix spp.*) with fibrosarcoma, **47**:881
Epstein-Barr,
antibodies to, in WI-L1 and WI-L2 human lymphoblastoid lines, **46**:647
antigens associated with, produced in experimentally infected lymphoblastoid cell lines, **46**:1243
blocking of direct membrane immunofluorescence in titration of membrane-reactive antibodies associated with, **47**:539
Virus—Continued
Epstein-Barr—continued
early antigens induced by, antibodies to, in Burkitt's lymphoma, **46**:861
fluorescence tests for human globulin and, **46**:383
heterotransplantation of 2 human lymphoid cell lines transformed *in vitro* by, **47**:771
in human lymphoblastoid cell lines,
culture methods and examination for, **47**:1193
percentage of cells positive for, enhanced by coculti-vation with African green monkey (vero) cells, **47**:535
possible relationship between infection with and certain chromosome aberrations, **47**:1203
seroepidemiology of antibody to, in monkeys, **46**:881
feline C-type, lack of relationship to human or canine cancer, **46**:281
feline leukemia, kittens infected with, mortality associated with atrophy of thymus and lymphoid depletion, **47**:807
Gross, lymphomas induced by, in culture, inhibition by phytohemagglutinin of DNA synthesis in, **46**:763
herpes simplex, differentiation by immunoferritin of virion antigens with use of rabbit 7S and 19S antibodies from early (7-day) and late (7-week) immune sera, **46**:629
herpes, various, antibodies to, in sera from patients with sarcoidosis, **47**:747
Herpesvirus saimiri,
lymphoid cell-culture line from lymph node of marmoset infected with, **46**:1099
malignant lymphoma with lymphocytic leukemia induced in owl monkeys by, **47**:837
oncogenicity of, in marmoset monkeys, **47**:1145
propagated in human cells, **47**:241
herpesvirus type 2, seroepidemiology of, and carcinoma of cervix in women, case-control matching, **47**:941
influenza,
type PR8, effect of, and calcium chromate dust and X radiation on lung tumor incidence in mice **47**:1129
and vesicular stomatitis, tumor immunity induced in mice with antigens prepared from, grown in suspension culture of Ehrlich ascites cells, **46**:1161
intracellular, differentiation of neoplastic cells from mouse myeloma accompanied by increase in, **46**:953
-like particles in spontaneous feline fibrosarcomas, transmissibility and ultrastructure of, **47**:1079
mammary tumor,
antigenically distinct forms of, in blood and mammary tissues of mice, **46**:1035
demonstration by antiglobulin consumption test with murine antisera of common antigens in tissues infected with, from different mouse strains, **46**:253
enhancement by pituitary isografts of mammary hyperplastic nodules in adreno-ovariectomized mice **46**:1251
in GR mice, biologic and morphologic characteristics of mammary tumors developing from, **46**:885

Virus—Continued
mammary tumor—continued
isolated from rhesus monkey, infectivity of cell cultures by, **46**:127
mouse, nodule bioassy of, modifications and quantitative considerations, **46**:1309
particles of, in BALB/c mammary nodule outgrowth lines transplanted into BALB/c *f.* C3H and (C3Hf × BALB/c)F_1 mice, **46**:1153
replication of, in tumor cell cultures, dependence on hormone-induced cellular organization, **47**:455
spontaneous occurrence of precipitating antibodies to, in mice, **47**:801
Marek's disease,
antigen detected in feather follicle epithelium of chickens vaccinated against, **47**:113
cutaneous, pathogenesis of, in chickens, **47**:389
replication of, in chicken and in cell culture, **47**:207
Mason-Pfizer monkey, isolated from spontaneous mammary carcinoma of female monkey, antigens to, detected by immunodiffusion, immunofluorescent, and virus agglutination techniques, **46**:1325
murine leukemia,
Friend,
cell surface antigens detectable by cytotoxic test on tumors induced by, and infected with, in rat, **46**:449
complex, isolation and characterization of lymphatic leukemia virus in, **46**:1209
established, suppression of, by statolon, development of FV-leukemogenic and FV-immunogenic activities in bloods, spleens, and lymph nodes, **46**:797
Gross,
alteration of skin in, kinetic, preleukemic, and irradiation studies of, **47**:361
immune response to lymphoma induced by,
cellular kinetics in W/Fu rats, **46**:621
kinetics of cytotoxic antibody response in W/Fu rats, **46**:391
leukemia induced in rat by, compared with 7,12-dimethylbenz[*a*]anthracene-induced leukemia, **47**:161
mice protected against, by interfering action of nonleukemogenic C-type murine viruses inoculated into newborns, **47**:575
strain A, AKR mice congenitally infected with, resistant to lymphoid leukemia associated with chronic protozoan infection, *Besnoitia jellisoni*, **47**:485
Moloney,
C-type particles released from rat thymus cultures infected with, **46**:11
repeatedly demonstrated after treatment with 7,12-dimethylbenz[*a*]anthracene and 3-methylcholanthrene, **46**:751
rapid assay of helper activity of, for Friend spleen focus-forming virus, **46**:1219
Virus—Continued
murine leukemia—continued
Rauscher, susceptibility of C57BL/6 mice to, virus multiplication in C57BL/6 cells *in vivo* and *in vitro*, **47**:1299
in vitro production of, by cells differing in single allele, **46**:1335
murine lympholeukemogenic, BALB/Tennant-leukemia,
immunogenicity of various cellular and cell-free preparations compared in leukemia isotransplant system, **47**:953
presence of, in cultured cells correlated with their immunogenicity in leukemia isotransplant system, **47**:781
murine nonthymic lymphatic tumor, early morphologic changes associated with infection by, **46**:481
murine sarcoma,
foci of, differences in, formed in mouse and rat cells under soft agar overlay, **46**:1001
Harvey, cellular interactions *in vitro* with cells from tumors induced by, **46**:1229
Kirsten, differences in susceptibility of human cells to, **47**:65
Moloney,
added to bovine milk, recovery of, **46**:121
role of interferon in protective effect of double-stranded polyribonucleotide against tumors induced by, **47**:1345
polyoma,
electron microscopy of acute thymic involution induced by, in mice, **47**:289
epitheliomesenchymal interactions in proliferative response evoked by, in odontogenic epithelium *in vitro*, from mouse embryos, **47**:711
stimulating influence of Bacillus Calmette-Guérin on immunity to polyoma tumors in mice, **47**:1013
protovirus hypothesis, significance of RNA-directed DNA synthesis for normal development and for carcinogenesis, **46**:III (Feb.)
in pulmonary adenomatosis of sheep (Jaagsiekte), ultrastructure of tumor, **46**:525
RNA tumor-virus antigen expression in chemically induced tumors, virus-genome-specified common antigens detected by complement fixation in mouse tumors induced by 3-methylcholanthrene, **47**:1255
Rous sarcoma,
Bryan and Schmidt-Ruppin strains, loss of contact inhibition of movement of chick embryo cells in tissue culture when infected with, **46**:323
gliomas induced by, in dog, ultrastructure of, **46**:539
growth of uninfected and chick-embryo fibroblasts infected with, inhibited by rifampicin, **46**:785
tumor-specific transplantation and membrane antigens in mouse cell lines transformed *in vitro* by, **47**:819
type O, relationship between initiating dose and concentration of, in tumors of germfree quail, **46**:1093

Virus—Continued
Sendai,
dependence of chromosome pulverization in Chinese hamster cells fused with, on events in G2 period, **47**:401
ultraviolet-inactivated, studies of pulverized chromatin induced in fused cells of Chinese hamster cell line Don by treatment with, **47**:961
Shope papilloma, surface antigens of papilloma cells induced by, trypsin sensitivity of, **46**:353
simian sarcoma, type 1 (*Lagothrix*), tumors induced in marmoset monkeys by, **47**:1115
simian vacuolating (SV40),
cell line initiation from cord blood leukocytes treated with, and with chemicals and X radiation, **47**:479
chromosomal changes in Syrian hamster cells transformed by, and variants of defective SV40 (PARA), **47**:35
immunologic cross-reactivity between antigen of unfertilized mouse eggs and mouse cells transformed by, **46**:1317
longevity of strains from individual foci of human amnion cells transformed by, **47**:733
and Moloney sarcoma, susceptibility of unfertilized and fertilized mouse eggs to, **47**:1045
properties of arginase from hamster fibrosarcomas induced by, and hamster liver tissues, **46**:615
unusual, in cultures from human nasopharyngeal carcinoma, **46**:299
vaccinia, mouse embryo cells transformed by, **46**:225
Yaba,
in cynomologus monkey kidney cells, plaque assay of, **47**:219
poxvirus, immature particle formation of, studied by electron microscopy, **47**:549
Vitamins:
A, carcinogenesis inhibited in mice by, **47**:667
B_{12}, role of, and folic acid in DNA-thymidine synthesis in neoplastic C3H mouse cell strain, **47**:277

Walker 256 tumor:
antitumor activity of tilorone hydrochloride, a synthetic small molecular-weight inducer of interferon, against, in rodents, **46**:431
feto-tumor serum antigens, serologic studies with, in rats, **47**:871
light, immunofluorescent, and electron microscopic observations on sequence of events in experimental metastases of, **46**:493
water intake and exchange and hydration of rats during growth of, **46**:825
Water, intake and exchange and hydration of rats during growth of Walker 256 carcinoma, **46**:825
Weight (body):
at birth and leukemia in childhood, **47**:501
lasting influence of early caloric restriction on neoplasm prevalence in rats, **47**:1095

X-ray irradiation *see also* Radioactive materials
alterations of skin in Gross murine leukemia during, **47**:361
cell line initiation from cord blood leukocytes treated with, and with chemicals and virus, **47**:479
combined effect of, and 5-fluorouracil on survival of transplanted leukemia cells in syngeneic AKR mice, **47**:865
effect of polyinosinic-polycytidylic acid on induction of primary or transplanted tumors in mice by, **46**:1009
evolution of cell-mediated immunity in mice bearing tumors produced by mammary carcinoma cell line, influence of tumor growth, surgical removal, and treatment of cells with, **46**:981
lesions induced in germfree rats by, **47**:229
mouse survival after, **46**:963
whole-body, effect of,
on incidence of leukemia in rats, **46**:1138
100 R, and calcium chromate dust and influenza virus on lung tumor incidence in mice, **47**:1129

Prediction of Response in Cancer Therapy (No. 34)

Cell kinetics and therapeutic response:
discussion of, 25
kinetic behavior versus response to chemotherapy, 2
role of cell kinetics,
limited, in clinical cancer chemotherapy, 15
possible, in prediction of response to cancer therapy, 19
Clinicoepidemiologic factors:
data analysis methods for inferring natural history of chronic diseases, 75
discussion of, 291
familial factors relating to prognosis of leukemia and lymphoma, 283
scientific defects in staging of cancer, 268
Genetic factors:
discussion of, 135
predictive tests in culture of drug-resistant mutants selected *in vivo*, 131
search for a key, 118
General discussion and summary, 293
Hormonal influences:
basic difficulties in predicting response to therapy by endocrine assays, 39
competition between steroids for hormonal receptor, 77
discussion of, 85
estradiol uptake by induced rat mammary tumors, its implications for treatment of breast cancer, 33
estrogen receptors and breast cancer response to adrenalectomy, 55
estrogens in breast tumors, 71
factors influencing uptake of steroid sex hormones by target tissues, 30
search for best model of breast cancer, 43
Immunologic factors:
cellular immune responses and prognosis in malignant lymphomas, 109
discussion of, 113
preclinical evaluation of interrelationship between cancer chemotherapy and immunity, 90
Immunologic factors—Continued
prognostic significance of cutaneous anergy for surgical treatment of solid neoplasms, 103
Introduction, XI
Leukemia:
anticancer effects of propanals, human and animal tumor systems compared, 161
discussion of, 181
DNA synthesis in leukemic cells under action of cytotoxic agents *in vitro* and *in vivo*, 153
effect of antifolics in mouse, 167
prediction of methotrexate responsiveness of tumors in man, 179
relevance of *in vitro* tests for predicting responsiveness to antitumor agents, 138
selecting drug regimens in human, 145
Solid tumors:
analogues of purine nucleosides, 184
biochemical approaches to prediction of response in, 189
discussion of, 211
effects of chemotherapy on incorporation of ^{3}H-thymidine into DNA of human neoplastic tissue, 197
enzymic synthesis of steroid sulfate by mammary cancer and its clinical implications, 205
In vitro predictive tests:
analysis of individual chemotherapy assay system, 240
discussion of, 263
prediction of response to,
cancer chemotherapy in tumor and host, 251
L-asparaginase therapy, 257
qualitative and quantitative sensitivity tests for cancer chemotherapy, 247
In vivo histologic studies:
cellular prognosis in cancer of cervix, 221
discussion of, 235
pathologic features of prognostic import in human cancer, 216
prediction of drug sensitivity with cancer-seeking isotopes, 225

Immunosuppression by antilymphocyte serum and its effect on tumors induced by 3-methylcholanthrene in mice. J. L. Wagner and G. Haughton 1
Release of C-type particles from normal rat thymus cultures and those infected with Moloney leukemia virus. Yael Teitz, Edwin H. Lennette, Lyndon S. Oshiro, and Natalie E. Cremer 11
DNA replication patterns in chromosomes of several transplantable ascites hepatomas of the rat. Motomichi Sasaki .. 25
Hodgkin's disease in English and African children. C. Burn, J. N. P. Davies, O. G. Dodge, and Brigitta C. Nias 37
Lymphoproliferative diseases of fowl: Alteration in lactate dehydrogenase isozymes associated with lymphoblastic leukemia (JM-V). M. L. Adams, A. J. Kenyon, N. D. Jones, N. F. Schmidt, and S. N. Kim 43
Mitotic, chromosomal, and nucleolar alterations induced by thioacetamide in relation to the mitotic cycle after partial hepatectomy. Stefan Mironescu and Martha Ciovirnache 49
Certain mortality patterns of esophageal cancer in the United States, 1930–67. Bruce S. Schoenberg, John C. Bailar III, and Joseph F. Fraumeni, Jr 63
Variation of dihydrofolate reductase activity during *in vitro* and *in vivo* growth of sublines of L1210 lymphoma. Brian L. Hillcoat 75
Tumor induction by repeated injections of urethan in newborn and adult hamsters: Age influence. II. Bela Toth 81
Resistance to transplants of recent spontaneous parental line tumors by F_1 hybrid hosts. Barbara H. Sanford and Sophie F. Soo 95
Effect of heterologous antithymocyte serum on mouse skin tumorigenesis. Nechama Haran-Ghera and Miriam Lurie 103
Growth of multicell spheroids in tissue culture as a model of nodular carcinomas. Robert M. Sutherland, John A. McCredie, and W. Rodger Inch 113
Recovery of Moloney murine sarcoma virus added to bovine milk. Charles L. Burger, C. Craig Chamberlain, Marilyn C. Barstow, and Bernard C. Maher 121
Infectivity of cell cultures by a virus isolated from a mammary carcinoma of a rhesus monkey. Harish C. Chopra, Inna Zelljadt, Erling M. Jensen, Marcus M. Mason, and Norman J. Woodside 127
Graft-versus-host reaction modified by *in vitro* preincubation of marrow with subcellular antigen. Delta E. Uphoff and Laurence R. Draper 139
Carcinogenicity of isosters of epoxides and lactones: Aziridine ethanol, propane sultone, and related compounds. B. L. Van Duuren, S. Melchionne, R. Blair, B. M. Goldschmidt, and C. Katz 143
Clinical and pathologic characteristics of graft-versus-host disease produced in cyclophosphamide-treated adult mice. Joel S. Sandberg, Albert H. Owens, Jr., and George W. Santos 151
Incidence of multiple primary cancers. IV. Cancer of the female breast and genital organs. David Schottenfeld and John Berg 161
Characteristics of primary tumors induced by carcinogenic polycyclic hydrocarbons in Syrian hamsters. J. A. DiPaolo, R. L. Nelson, and P. J. Donovan 171
Radioautographic analysis of 7,12-dimethylbenz[*a*]anthracene-^{3}H incorporation and cell survival of Syrian hamster embryo cells during exposure to nucleic acid inhibitors. D. I. Connell, L. A. Riechers and J. A. DiPaolo 183
Abrogation of passively transferred tumor immunity *in vivo* by antigenically related tumor cells. Harold T. Wepsic, Irwin D. Bernstein, Berton Zbar, Tibor Borsos, and Herbert J. Rapp 195
Deaths from childhood leukemia and solid tumors among twins and other sibs in the United States, 1960–67. Robert W. Miller 203

In vitro "spontaneous" neoplastic transformation of mouse fibroblasts in diffusion chambers. GIORGIO PARMIANI, GIUSI CARBONE, and RICHMOND T. PREHN 261

Electron probe analysis for iodine in human thyroid and parathyroid glands, normal and neoplastic. WILLIAM G. BANFIELD, PHILIP M. GRIMLEY, WILLIAM G. HAMMOND, CHARLES M. TAYLOR, BARBARA DEFLORIO, and A. J. TOUSIMIS 269

Abnormal size profiles of soluble macromolecules from azo-dye liver tumors. SAM SOROF, EMILY M. YOUNG, REGINA Z. MCBRIDE, and CAROL B. COFFEY 275

Current information on feline and canine cancers and relationship or lack of relationship to human cancer. MURRAY B. GARDNER 281

Studies on the utilization of asparagine by mouse leukemia cells. TOSHIHIKO UBUKA and ALTON MEISTER 291

An unusual virus in cultures from a human nasopharyngeal carcinoma. B. G. ACHONG, P. W. A. MANSELL, M. A. EPSTEIN, and P. CLIFFORD 299

Histologic and electron microscopic observations on a tumor-bearing viper: Establishment of a "C"-type virus-producing cell line. R. F. ZEIGEL and H. F. CLARK 309

Behavior of chick embryo cells in tissue culture when infected with Rous sarcoma virus. I. Loss of contact inhibition. WARREN LEVINSON, DAVID HEILBRON, and JEAN JACKSON 323

Disorganization of mouse bladder epithelium induced by 2-acetylaminofluorene and 4-ethylsulfonylnaphthaline-1-sulfonamide. PATRICIA E. LEVI, JUDY C. KNOWLES, DIANA M. COWEN, MARGERY WOOD, and EDWARD H. COOPER 337

Further studies on surface antigen of Shope papilloma cells: Trypsin sensitivity. AKINORI ISHIMOTO and YOHEI ITO 353

Studies on the chemotherapy of experimental brain tumors: Evaluation of 1-(2-chloroethyl)-3-cyclohexyl-1-nitrosourea, vincristine, and 5-fluorouracil. WILLIAM R. SHAPIRO 359

Chromosomal analysis of lymphoblastoid cell lines after heterosexual cocultivation with bone marrow fibroblasts. MATILDA BENYESH-MELNICK, MILAN MACEK, EDDIE H. SEIDEL, and VERA MACKOVÁ 369

Fluorescence complement fixation by lymphoblastoid cells. ROGER FLOYD, VLADIMIR VONKA, and MATILDA BENYESH-MELNICK 383

Immune response to Gross virus-induced lymphoma. I. Kinetics of cytotoxic antibody response. RONALD B. HERBERMAN and MARK E. OREN 391

Carcinogenic effects of polycyclic hydrocarbon carcinogen administration to mice during pregnancy on the progeny. ORHAN M. BULAY and LEE W. WATTENBERG 397

Cell culture of three antibody-producing murine plasmacytomas. PHILLIP PERIMAN 403

Mouse myeloma tumor stem cells: A primary cell culture assay. C. H. PARK, D. E. BERGSAGEL, and E. A. MCCULLOCH. 411

Growth of Novikoff rat hepatoma cells in suspension culture in the presence of adenosine 3′,5′-cyclic monophosphate. JOACHIM SCHRÖDER and PETER G. W. PLAGEMANN 423

Antitumor activity of tilorone hydrochloride against some rodent tumors: Preliminary report. RICHARD H. ADAMSON 431

Isotope dilution determinations and other studies of cytidine diphosphate choline, cytidine diphosphate ethanolamine, deoxycytidine diphosphate choline, and deoxycytidine diphosphate ethanolamine in liver and liver tumors. WALTER C. SCHNEIDER 435
